Aquascaping Magnetic Light
Model NO.: P24001MOD Frequency: 50-60Hz
Charger Input: DC5V-2A
© 2025 All Rights Reserved

Quick Start Guide

Congratulations on purchasing your Magnetic Light
Read this guide to get started to installing and setting your lighting

Light

Dimmer Cable

Metal sheet

Wire clip

Viewing Stand

Installation to Viewing Stand

The built-in magnet of the lights sticks to the Viewing Stand. Put the power supply cord through the hole on the back of the Viewing Stand before installing the lights. The lights position can be adjusted according to the tank and plants.

Non-magnetic Objects

Installation to non-magnetic objects

First stick the metal sheet on non-magnetic objects such as wood and plastic, and insert the connector into the lighting fixture. The lighting fixture is close to the metal sheet, and it will be adsorbed on the metal sheet by magnetic force.

Glass Cover

Installation to glass cover

It can be directly on the glass cover, connected to the power supply, and you can use and enjoy your beautiful scenery.

Enjoy your Magnetic Light now!
